Canadian National Railways

Arts and Crafts Club

The Arts and Crafts Club met on Thursday March 19, at the home of Mrs. James Malloch.

Mrs. Wm. Robertson gave a very instructive and interesting demonstration on patch work embroidery.

During the evening musical numbers were rendered by Miss MacNab, Mrs. Outway, Mrs. Eglar, and Mrs. Joe Smith, which were greatly enjoyed by all present.

Refreshments were served by Mrs. Malloch and Miss Ashcroft, after which the meeting adjourned.

Red Cross Classes

Under the auspices of the C. R. C. S., classes for home nursing are shortly to be held here in Stony Plain. This is a very important as well as a very interesting subject for women to study, and it is hoped that as many as possible will avail themselves of this opportunity and attend all, if possible, of the meetings. A preliminary meeting will be held at the Town Hall at 8 p.m. on Wed., April 8th, when Miss West, from the Red Cross Headquarters, Calgary, will give an address.

LOCAL NEWS.

Mr. and Mrs. R. C. Propp returned on Sunday from a lengthy visit to their old home in Nebraska.

Mr. Louis Hennig, a former resident of this district, who had been living in Portland and Chicago since leaving here, has returned to Stony and is negotiating for the purchase of a farm.

Mr. A. Klapper's condition has improved the past fortnight, and he expects to return home by Easter Sunday from the hospital.

Mr. and Mrs. Joe Guenette and daughter Simone are leaving shortly on an extended visit with old friends at Montreal and vicinity.

Mrs. W. Clarke, Victoria, is visiting in Stony this week with her daughter, Mrs. J. H. Eory.

Miss Brett has resumed her teaching duties at Comet school.

Mrs. J. W. Edkins is suffering from an attack of pleurisy and pneumonia, and has been taken to Edmonton for treatment.

J. Trzinsky is down from Bruhl on business relating to his farm west of town.

Mr. Wm. Gaden, Medicine Hat, returned home Saturday, after a brief visit here at his parents' home.

Mr. and Mrs. Ulrich and children left Saturday for their new home near Medicine Hat.

Mr. Ed Gronbeck, who spent several weeks at Royal Alexandra hospital, had recovered sufficiently to be taken home to Stony on Saturday.

S. R. Jacobson, of the Immigration and Colonisation Dept. of the Canadian National Ry., has arranged to pay a visit to Stony, to discuss with those interested the matter of placing farm help with the farmers in this district.

The projected change in the time table on the C. N. Ry. is said to consist of the three-times-a-week Prince Rupert train leaving leaving Edmonton at 9 p.m., instead of 1:30, as at present.

Mr. Louis Falar got in another car of farm implements this week.

A school of instruction for Ford tractor owners is being held in Edmonton this week, and about ten young men have gone in from Stony to take advantage of the free lessons.

The 25-acre farm and house, south of St. Matthew's school, occupied for a number of years by Mr. Jim Warner, has been sold to Mr. Jacob Strassburger Jr. by Mr. John Knobel, who acquired it a year ago.

A very attractive display will be shown at the Miller General Store tomorrow and Saturday, of sample garments, in ensemble dresses, suspenders, dresses, spring suits and coats for women, etc.

A Winning Fight

In promoting health and combating disease the great majority of people will readily admit the old adage holds true and that an ounce of prevention is worth a pound of cure. The trouble is that while Government, municipalities and people in general believe this, they do not always act upon their belief and live up to it. If they did there would be far less sickness and disease, fewer deaths and enormously less physical suffering, all of which would result directly in great financial gain to the State and to the individual citizen, and largely increase the productive power and prosperity of the world.

Again, while people generally agree that prevention is better and cheaper than cure, whether it be in the matter of health, or fire, or war, the majority remain rather lazy on the subject, with the result, that they are critical of expenditures necessary to the taking of preventive measures, but at the same time are quite prodigal in spending money to cope with a crisis when one is precipitated, but which could have been prevented by foresight and a much smaller expenditure.

Let an alarming epidemic of disease break out and begin sweeping through a community and the people will stop at no outlay of money to check it, although they may have year after year refused to vote a comparatively small sum which would have removed the menace which finally caused the epidemic. There was a very serious epidemic in Canada over the piling up of a war debt of two billions of dollars, but there is now criticism of an annual expenditure of a couple hundreds of thousands as Canada's contribution towards the cost of the administration of the League of Nations in its endeavor to prevent future wars by removing cause for them.

It is necessary, therefore, to bring to the attention of all people as frequently as possible the decided benefits to themselves resulting from the taking of proper measures of prevention as individuals and as represented by Governments, Federal, Provincial and Municipal. It is in the interest of all that attention is drawn in this article to some remarkable advances made in recent years in the scientific prevention of disease.

Take smallpox as an example. There was a time within the memory of many people when this disease was quite common and the death toll very high. In the city of Montreal in 1885 smallpox was the cause of 3,164 deaths that year, but the costly lesson of that epidemic resulted in general vaccination throughout Quebec with the result that there has been no repetition of the epidemic. On the other hand, vaccination was largely neglected in the Windsor district of Ontario with the result that last year an epidemic in virulent form developed, and of those who contracted the disease and had not been vaccinated 71 per cent. died. On the other hand had not one single death occurred in the case of a person who had ever been vaccinated. The epidemic was quickly controlled by the vaccination of practically the whole community, 50,000 people submitting to vaccination in two weeks. Vaccination is prevention of smallpox, yet in the face of established facts many people neglect to have their children made immune and some even vigorously object to it.

Consider diphtheria, once a dread disease, and still all too prevalent because of neglect of proper precautions. Given antitoxin at the first indication of the disease and the chances are all in favor of a mild type of the disease and recovery of the patient. But better still is to immunize all children with toxin antitoxin so they will not contract diphtheria, and it has been positively established that through toxin antitoxin children are protected against diphtheria.

Or consider typhoid. Since 1900, typhoid fever, once so prevalent in North America, has been reduced by an average of 78 per cent. This was accomplished almost entirely by human intervention, by studying the cause of typhoid fever and then destroying it by what the Minister of Public Health for Saskatchewan has described as, fire-proofing the individual against it. The total abolition of typhoid is quite definite in sight if individuals and communities will only take full advantage of the preventive means now available to all. Already in Saskatchewan typhoid has disappeared from the list of fifteen diseases causing the greatest mortality.

The Great War taught the world one great and invaluable lesson. For the first time in history huge armies, unparalleled in numbers, were practically free from those two old army diseases, typhoid and smallpox, which formerly killed thousands. The compulsory use of methods of inoculation in the army have left objects to vaccination and inoculation without an argument. Tuberculosis, the dread great white plague, is also being overcome through education and the application of proper methods. The death rate is steadily decreasing. The betterment is being brought about, not through cures, but by prevention. Today the three Prairie Provinces have the lowest death rate from tuberculosis of all the Provinces.

Is the total banishment of these diseases merely an Utopian dream? No. An eminent public health man draws attention to the fact that leprosy has disappeared from the entire life of Europe, whereas 600 years ago, with one-tenth the population of today, Europe had 3,000,000 houses of refuge for the innumerable lepers of that day. Had leprosy continued, 190,000 such houses of refuge would be required today, while as a matter of fact there is not one. Leprosy is in Europe an abolished disease. We can likewise abolish smallpox, typhoid, diphtheria and tuberculosis if we go about it the right way and make use of the modern scientific science and the tireless research workers of the world have given us.

Our Northern Wards

Heavy Cost of Preserving Law and Order Among the Eskimos

Quite evidently the Eskimo inhabitants of the northern coastlands of Canada need a good deal more regular attention than the mounted police can give them unless the strength of that force is very considerably increased. They would get it, too, if there was any way of making them pay the cost. They seem to be one class whose poverty and remoteness give them exemption from taxation. That being the case, the rest of us will have to count it part of the white man's burden to go on establishing police posts and patrols in that far off hinterland in order to keep the Eskimos from killing one another and murdering missionaries and traders who wander into their domain—Edmonton Bulletin.

Joint Soreness Subdued, Swellings Quickly Reduced

Wonderful Results From Rubbing the Sore Parts With

NERVINE

"My testimony should convince anyone that Nervine is a splendid preparation to use on swollen joints. Rheumatism left me badly crippled," writes Anne E. Fleming, from the Fraser Valley to McKays' Drug Store and they recommended Nervine, which restored me completely. For Rheumatic pains, Lumbago, Sciatica, you will get lasting satisfaction. No harmful drugs. Sold everywhere.

Game Law Conference Endorsed

Alberta has endorsed the proposed conference of game law officials of Canadian provinces and adjoining states. Manitoba proposed the meeting, and Minnesota has already endorsed it. Ontario has been asked to support the scheme. It is sought to provide adequate machinery for mutual protection and control of game on inter-provincial and international borders lands to and to breakers of law seeking immunity across these borders.

FEELING TIRED IN SPRINGTIME

Not Sick, But Not Quite Well—You Need the Help of Dr. Williams' Pink Pills

With the passing of winter many people feel weak, depressed and easily tired. No particular disease but the system lacks tone. You find yourself tired, low-spirited, and often unable to get sound sleep at night. All this is the result of indoor confinement of the winter months, and shows that the blood has become thin and watery. New, rich, red blood is what you need to put you right, and there is no other medicine can give you new blood as surely and as speedily as Dr. Williams' Pink Pills. This new blood goes to every part of the body and quickly improves the general health. Digestion is toned up, you have a better appetite, nerves are strengthened and sleep is sound and refreshing.

The value of Dr. Williams' Pink Pills when a system is new blood is shown by the experience of Mr. William Mitchell, R.R. No. 1, Bedford, P.E.I., who says: "A few months ago I found myself in a badly run down condition. My appetite was poor, I was easily tired and did not sleep well. I tried several so-called tonics, but did not get any relief. Then I decided to give Dr. Williams' Pink Pills a trial and soon found that I had got the right medicine. Gradually my strength came back, the dull, tired feeling disappeared, and after using the pills for about a month, I could eat heartily and was as strong and active as ever I have been. I can most cheerfully recommend Dr. Williams' Pink Pills as an unsurpassed tonic."

You can get Dr. Williams' Pink Pills from any dealer in medicine, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Nothing pleases a woman more than being able to convey a piece of information to another woman.

B.C. Berry Growers

Are Looking Forward to a Good Season 1925

British Columbia berry growers are looking forward to a good season in 1925. A recent survey shows that there are now 2,538 berry growers in the province, located in the Fraser, Kootenay, Okanagan, Salmon Arm and Vancouver Island districts. The same survey shows that the acreage under cultivation to berries totals 6,308, largely devoted to the cultivation of raspberries, strawberries, loganberries, red and black currants and gooseberries.

Cause of Asthma. No one can say with certainty exactly what causes the establishment of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to eradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which will give relief to asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

Would Increase Radio Fees

Advocates Heavier Tax on Listeners to "See That Radio Can Progress"

An increase in the radio fee to listeners-in was advocated to the special copyright committee of the House of Commons by R. H. Combs, Canadian Radio Trades Association, Toronto. "If you suggest that the fee be raised," stated Mr. Combs, "to get more revenue, or that an appropriation be made by the house to give the department a sufficient sum of money to properly control the operation of the radio in Canada, so that radio can progress along ordinary lines."

Manitoba Agricultural Products

In 1924 Were Nearly Double That of Previous Year

Agricultural products of the province of Manitoba during the year 1924 reached a total estimated value of \$16,412,557, according to figures issued by the provincial department of agriculture. This amount is nearly double that of the previous twelve months. The greater part of the spread is accounted for by the difference in the value of field crops during these two years.

It Will Prevent Ulcerated Throat

At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

Taking Flight from Belgium

Alleged Plot of Belgian Bankers Has Been Discovered

Nearly 3,000,000,000 francs in capital are estimated by the judicial authorities to have been exported from Valenciennes, France, chiefly to Belgium, in the last three months. It is claimed that Belgian bankers began a systematic campaign to encourage the exportation several months ago. This is reported to have been revealed through the arrest of a Belgian doctor at the frontier. He had disguised himself as a hunchback, his false hump being stuffed with French securities.

There are worlds of thought! Decide if you would like to be where one is going before you follow it.

Minard's Liniment for Colic

Buying Power

Interim Wheat Pool Payment Should Stimulate Spring Trade

The release of \$20,000,000 among 92,000 Western Canada farmers cannot fail to have a stimulating effect upon all lines of business. This interim payment from the wheat pools represents a net addition to prairie buying power, since it has not been hypothecated in advance. The date of its payment and the amount per bushel were unknown up to the time the payment was made, and it has therefore not been spent or pledged in advance, as was the case with a great part of the money received as initial payment.

Thirty-five cents a bushel, representing a clear cash profit after costs of production and freight have been paid, is a very considerable sum of money, even to the man who has farmed on a small scale, and it will enable him to buy many necessities whose purchase has been postponed. The phenomenon which has been somewhat mistakenly called "buyers' strike" should now give place to a lively season of spring buying—Winnipeg Tribune.

Wants Everybody to Know That

Dodd's Kidney Pills Have Relieved Him of Kidney Complications

Joseph Hardy, After a Long Period of Sickness Says Dodd's Kidney Pills Have Done Him Good.

Montreal, Que.—(Special)—Feeling quite well again after suffering for seven years, Joseph Hardy, a well known resident of this place is recommending to his fellow countrymen Dodd's Kidney Pills. "I have used Dodd's Kidney Pills and found them very satisfactory," Mr. Hardy states in an interview. "I suffered with my head and heart. I could not sleep very well and I was always tired and nervous. I took half a dozen boxes of Dodd's Kidney Pills and they have done me much good. I make no error in recommending them to my fellow countrymen as a remedy for sick kidneys."

If you have any symptom mentioned by Mr. Hardy, you may sure your kidneys need attention. Neglected kidneys are the cause of more than half the ills to which mankind is heir. Dodd's Kidney Pills act directly on the kidneys, making them strong and healthy. Sound kidneys mean pure blood. Pure blood means good health.

How can a man be expected to hit the mark if he leads an aimless existence?

There's no need of accidents if you'll drive carefully and learn to read a sign-walker's mind.

Liver and Bowels Right—Always Feel Fine

There's one right way to speedily tone up the liver and keep the bowels regular.

Carter's Little Liver Pills never fail. Millions will testify that there is nothing so good for biliousness, indigestion, headache or sallow, pimply skin. Purely vegetable. Small Pill—Small Dose—Small Price.

Population of the World

Was 850,000,000 in 1830 and Has Since Doubled

In the year 1830 the world had only 850,000,000 inhabitants. Since then the population has doubled. Prof. Rose estimates that in the year 2025 the world will have three and a half times as many people as now. "Race suicide" is a mythological evil; doesn't exist at all, from a broad world viewpoint. The day may come when all habitable parts of the earth will be as overcrowded as China. But that the overcrowding problem will be solved some way is a pretty safe bet. As for the present, the farmers will be grateful for more mouths to feed with their surplus products.

Logical Route For Shipping Western Grain To Europe Is Via Hudson's Bay Route

Speaking quite naturally from a Vancouver standpoint, the Province and Sun declares the loss arising from export of Canada's grain through American ports. The Sun says: "Ten years ago New York was handling 11 1/2% of no Canadian grain. Montreal, Halifax and St. John did most of this business. Of the 1922 crop, New York handled 32,000,000 bushels of Canadian grain against 67,000,000 via Montreal."

"When the Yukon goes on for business he goes after it with a vengeance. The Yukon has gone after the Canadian grain business and today they control it. Of the 1922 crop, 32,000,000 bushels of Canadian grain moved from Port William to world markets via American boats, American railroads and American Atlantic ports."

"There is no use asking how New York or Buffalo can take this business away from Canada. The fact is that they are doing it."

The shortest route of all to Europe, therefore, the one that could best meet all competition, is the Hudson Bay route."

The Province says: "Canadian grain, routed westward, finds a market through Canadian channels only. There are no pickings on the route for the foreigner. Any profit there is comes to Canadian pockets or pays interest on Canadian investments."

"The 'foreigner' mentioned is our good neighbor but ultra-keen business man—the Yankee—who has placed a prohibitive tariff on Canadian wheat, yet is not averse to accepting a profit of millions for handling its results."

With the Hudson Bay route in operation, all Canadian grain could, and should, reach Liverpool and cheap transportation at Canadian ports—thereby reducing the entire industry and profits within the Dominion."

Competent authorities have estimated Canada's loss at \$35,000,000 due to alien transport of grain. "This would be much more than sufficient to complete the rail routes to the ocean arm provided by means to transport Canada's export surplus of wheat."

Why not stop that leak of millions and enhance the entire Dominion's prosperity?"

"Even the case is lessening its opposition to the Hudson Bay project shown by the following paragraph in the Monetary Times:

"The Hudson Bay scheme may be impracticable. It is at least premature. But most of the work is done, and this work is of practically no value unless the road and some terminal facilities are completed. The scheme may be a piece of folly, but it would be a greater folly to leave it as it is. The opinion of experts as to its value is divided, and can be settled only by practical test."—Monetary Times.

Grazing Leases

Long Term Leases in Saskatchewan Covering Lands Not Suitable For Cultivation

By order of the council dated the 7th of February, 1925, an addition was made to the Dominion grazing regulations whereby the minister of the interior is authorized to issue twenty-one-year grazing leases on vacant Dominion lands in the provinces of Saskatchewan and Alberta in districts which are not suitable for farming. The order in council also authorizes the issue of renewal twenty-one-year grazing leases covering lands now held under lease in Saskatchewan in districts not suitable for farming, on the condition that, upon inspection by an officer of the department, the lands offered are found to be suitable for agricultural purposes, and that the lessee is utilizing the leasehold to its full extent for stock-raising purposes.

B.C. Dairy Stock For China

A large shipment of British Columbia dairy stock recently left Victoria for China. This consisted of a dozen milk cows and three yearling heifers. Included in the shipment were three pedigree Xanthippe heifers of British Columbia extraction and a pair of pedigree pointer dogs.

Math—'I gave you two cents to a good boy and you are misbehaving now—'Yes, mother! 'I can't be helped!'

For Research Work

Toronto University Interested in Establishment of Foundation to Carry on Investigations

Dr. William Mulock, chief justice of Ontario and chairman of the Dominion City of Toronto, announced at a gathering of prominent citizens at the York Club, Toronto, that the establishment of a foundation for the financing of further research similar to that which led to the discovery of insulin was the tentative plan of the board of governors of the university. It was announced that the university was prepared to stand behind the work, but was not in a position to provide the fund. A fund of \$250,000 is necessary.

Premier Edward Ferguson promised the government's support, and Mayor Egan said the city would do its part. Premier Ferguson added that his government would be inclined to be very generous should the government see fit to enlarge the foundation to include industrial research.

Poor Season For Fish

Catches Have Been Small and Export Prices Low

What has been one of the poorest fish seasons in several winters has come to a close. All large commercial licenses expired February 15 and the small domestic licenses March 15. In some lakes poor catches, taken in conjunction with low prices in export markets, has resulted in earlier closing of fishing operations than was expected. In very few cases this year, although there are always some, did the fishermen have to seek for the "maximum catch" limit for the particular lake was reached before the closing of the season.

According to stories brought to Edmonton from the north, Trout and Peewee Lakes on the A. & G. W. Railway, had the biggest catches of trout, Buffalo Lake, Sask., also made heavy shipments of white fish on that line, having had record catches.

Buying Land For Scottish Settlers

Block of Thirty Thousand Acres Purchased in Alberta

Plans for the settlement of 180 families of British stock in one block of land north of Vermilion, have been completed by the Scottish Immigrant Aid Society. It is announced by the Edmonton representative, Dave Conn, who has just returned from a trip to Winnipeg. The society has made the purchase from a Belgian corporation of 20,000 acres of land, which is located in one block and will be opened by the proposed extension of the Canadian Pacific Railway on the way to the Edmonton terminus.

Settlement on the land will begin this spring and work in preparation for the newcomers will start as soon as the snow leaves.

Public Shooting

Grounds Established

Peairie Provinces Have Also Added to Bird Sanctuaries

By recent orders in council, public shooting grounds have now been established in the provinces of Manitoba, Saskatchewan and Alberta. In Manitoba six distinct areas have been set apart; in Saskatchewan, twelve, and in Alberta, thirty-two. The difference between the number of areas set apart in each province is compensated for, generally speaking, by the great extent of the territory in Manitoba and Saskatchewan, respectively. Eleven new bird sanctuaries for the protection of game birds during the breeding season have also been established in Saskatchewan, in addition to those already set aside there and in Alberta.

Erect New Creameries

Contracts have been let by the Saskatchewan Creamery and Ice Cream Company for the erection of two new creameries, one at Outlook and one at Headingley, both in the province. The company already owns and operates over a dozen creameries in the southern portion of the province.

Shipments Of Argentine Cattle May Look For Keener Competition On European Market

Although without a doubt exportation of live cattle to Europe from the Argentine is bound to have some effect on the market it need have no marked discouragement, on Canadian shipments. It does, however, indicate that for the future we must look for keener competition, and improvement if possible of quality. It will be noticed that a embargo on the daily papers announced that 150 head, averaging over 1,200 lb., the first shipment in 25 years, had arrived at a French port, and was thought to mean a continuation of such consignments. Appropos of this the following comment in the January market report of the "Dominion" is noteworthy: "Recent consignments of special interest."

"Lord Vestey, in giving evidence before the British commission on food prices, stated that during 1924 the profits made by his company on their Argentine shipments of meat was less than 50c per hundred. Heavy handling and labor costs were mainly responsible. Sir Edmund Vestey, brother of Lord Vestey, said that during the last six months of the year their profits were practically nil. As for the present high prices of beef, it was given as a reason that the continent is now taking very large quantities equal to about 7,250,000 cattle during 1924. This has created a shortage and low average prices are not expected."

Expect Settlers From States

People Are Again Showing Great Interest In Canada

"We expect a great number of settlers to come from the United States this year than in any previous year," declared Dr. W. J. Black, director of colonization and development for the Canadian National Railways, who went to Victoria to confer with members of the British Columbia Government on colonization and cooperation between the provincial administration and the railway company.

"There is a real revival of interest in Canada throughout the Central States," Dr. Black stated. "I have had a conference with our United States representatives at St. Paul, and we expect quite a movement northward this year."

War On Crows and Gophers

Alberta Had Greatest Success in Extermination Campaign

Alberta's crow, magpie and gopher destruction campaign last year culminated in a similar drive which covered Canada and the United States. This latter competition was staged by a powder company with \$1,500 in prize, and as a result of the contest 57,826 crows disappeared; the Canadian contribution being 2,235. In the Alberta campaign, the statistics were far more numerous. No less than 44,852 magpies and crows were killed and 107,116 gophers were collected and destroyed. Gopher extermination was also effective in Alberta, 230,950 being killed. Alberta's prize money amounted to \$2,285.

New College For Edmonton

It is understood that a college for all nationalities will be erected at Edmonton by the Catholic educational authorities. The Carnegie Foundation, it is stated, has promised \$100,000 towards the cost, which is estimated to be \$250,000.

Several Good Reasons Given Why We Should Work For The Elimination Of Warfare

Russia's Wheat Production

Exports Have Increased Rapidly in Last Few Years

Whether Russia will be a factor in the world's wheat markets during the next few years is a question that lacks a definite answer, but one that has no important bearing upon a big Canadian industry. In the pre-war years Russia exported immense quantities of wheat to Britain, the amount in 1912 having been nine million hundredweight, and in 1919 twenty-eight million hundredweight, while in 1923 the total Russian export of wheat to all countries was about seven million hundredweight. Today Russia is exporting Canadian flour, so that it may be safely concluded, notwithstanding the nominal export figures, that Russia has hardly grown enough wheat for home consumption. Moore-Jaw Times.

Enlarging Work At Indian Head

Installation of New Mechanical and Electrical Machinery

Considerable enlargement of the scope and usefulness of the cereal processing conducted at the Dominion experimental farm, Indian Head, is to be undertaken in 1925, according to G. D. Matthews, who is in charge of the cereal and forage crop investigation at that institution. This increase of breeding selection and improvement in small grains is made possible by the installation of new mechanical and electrical machinery. This equipment has been specially manufactured to meet its requirements. It includes a threshing, cleaning, electric motor and scales.

Sodium Sulphate Deposits

New York Company Developing Deposits At Dunkirk, Sask.

It is understood that representatives of the Industrial Waste Products Corporation of New York have been investigating several sodium sulphate deposits in Saskatchewan with a view to development by the installation of the new "spray-drying" process for chemicals, which is controlled by this firm. It is stated that a plant covering this process was installed at the salt works near Dunkirk last fall, which resulted in increasing production from 39 to 50 tons of salt daily and has reduced the annual expenditure by approximately \$50,000.

New Buffalo Range

A movement has been started at Brandon to induce the Federal Government to establish the proposed new buffalo range near that city. A reserve near Douglas has been suggested as a most suitable stamping ground for the big heads. The matter will be taken up with the authorities at Ottawa at an early date.

Paying Visit To Canada

Under arrangements which have been made for exchange of visits between the southern commission of the League of Nations, for sanitation officials from various South American countries will visit Canada this spring or early summer.

An intercepting and authentic forecast of what the next war will be like was given in New York City at a luncheon of the Foreign Policy Association by a group of close students of social and chemical warfare, headed by Brigadier-General Lord Thomson, late chief of the air ministry in the Labor Government of Great Britain.

The consensus of the experts was that in the next war the airplane will be the chief weapon both for offence and defence; that the only real defence will be to attempt to raid the enemy's capital before he raids ours; and that civilians, particularly those living in large cities, will be the first and perhaps the chief casualties. These experts were careful not to include in any wild, Sunday-paper sensationalism; but they made it very clear that in their belief, trench warfare between professional armies is as extinct as the crossbow. The future military aim will be to demoralize the enemy by wrecking his chief cities, and particularly his capital, at the earliest possible moment. "A burning channel house" is the expressive phrase by which Lord Thomson described a city which had been the scene of a successful operation. Resistance will not, however, be exclusively by gas bombs, the present state of poison gas warfare being somewhat less advanced than is popularly supposed. To kill or disable the whole population of New York or London from the air as things now stand, would take a great many planes and a considerable period of time.

In considering aerial warfare, gas, incendiary and explosive bombs will be all used. The explosives will wreck buildings, killing many persons in the process. The incendiary bombs will start Japanese fires which cannot be put out, thereby destroying many store buildings and wrecks of buildings and killing additional members of the population. As to gases, several are available which can be used separately or in combination. Some of them are not one hundred per cent. effective if they remain on the clothing or skin long enough to burn through and get into the blood stream—a period of a few minutes. Other gases cause persons who come in contact with them to go blind, either temporarily or permanently. Still others induce unconsciousness over extended periods, or insanity which is usually temporary, but in some cases permanent. To be sure, methods of protection against poison gases in general exist. Masks, if used by well-trained soldiers, are fairly adequate, though they would afford no protection against Lewisite, which is a gas, and there is no safeguard against mustard and heavy gases in general. Gas can collect in cellars, subways, etc., except to abandon any place drenched with them for a period which may be as long as a fortnight.—New Republic.

Boom In Lumbering Industry

Comes Third in List of Manufacturing Industries in Canada

There was a general increase in all phases of the lumbering industry of Canada during 1924, as compared with the previous year, according to a report issued by the Dominion bureau of statistics. The average value of all the products and by-products of this industry in 1924 amounted to \$19,847,771, compared with \$13,124,150 in 1923, an increase of 50.4 per cent. In this respect the lumbering industry comes third on the list of manufacturing industries in Canada with pulp and paper industry and flour and grain mills second.

Ask-Brief Funeral

A provision that his funeral service at the church and the grave should last for only fifteen and two minutes respectively, is provided in the will of G. M. Vereker, Salscombe, England. He left five pounds to a clergyman to see that his wish was carried out.

Note Circulation Is Down

Dominion notes in circulation dropped approximately fifty millions during January while gold held against the notes was only about eight millions less. Notes were eleven millions less in January '21 than at the end of December.

Whoo Mare

One hundred and fifty Canadians drawn from every walk of life are charged with the success of the Jubilee, Exhibition and Stampede, commemorating the 50th anniversary of the arrival of the Montreal Plover at Calgary and the birth of the city which will be held during the week of July 4 to 11. That stampede at Calgary are not exactly dead and alive affairs may be gathered from the photograph reproduced above which was taken during the wild horse race last year.

A Romance of the Spanish Main CAPTAIN BLOOD by RAFAEL SABATINI

Copyrighted, 1922, by Rafael Sabatini

"CAPTAIN BLOOD," a Viagraph picture with J. Warren Kerrigan
in the title role, as an adaptation of this thrilling novel.

SYNOPSIS

Peter Blood, a young Irish physician, who had been wrongfully condemned as a slave to the Barbadoes under King James, is called in to help Arabella, niece of the military commander, at Bridgetown. He leads his fellow rebels on an attack on a Spanish ship which had laid the city low and captures it. He sails for Tortuga, the rendezvous of the pirates of the Spanish Main. He accepts command of a buccanier fleet, with Levasseur, a Frenchman, and his ship, under him. Madelon d'Ogeron, daughter of the friendly Dutch governor of Tortuga, is captured by Levasseur. Levasseur breaks faith with Blood and captures a Dutch brig on which is Madelon and her brother. Blood lands at the island where Levasseur proposes to hold the girl as hostage for ransom. Captain Blood pays the ransom. Levasseur draws and Captain Blood runs him through. Calumet, his aide, enters with Blood, who makes Madelon and her brother his guests on board his ship.

CHAPTER XVI The Milagro

In Tortuga, during the months he spent there refitting the three ships he had captured from the fleet that had gone out to destroy him, he found himself almost an object of worship in the eyes of the wild brethren of the Coast, all of whom now clung to the honor of serving under him. It placed him in the rare position of being able to pick and choose the crews for his augmented fleet, and he chose fastidiously. When he sailed away it was with a fleet of five fine ships in which went something over a thousand men. Thus you behold him not merely famous, but really formidable. Three captured Spanish vessels he had renamed with certain scholarly honor the *Chibolo*, *Lachesis* and *Atropos*, a grimly peculiar manner of conveying to the world that he made them the arbiters of the fate of any Spaniards he should henceforth encounter upon the sea.

And meanwhile the Spanish Admiral, Don Miguel de Espinosa, went raging up and down the Caribbean seeking his enemy, and in the meantime, as an hour d'oeuvre to his vindictive appetite, he fell upon any ship of Eng-

ONTARIO WOMAN REGAINS HEALTH

Wants Other Women to Know
About Lydia E. Pinkham's
Vegetable Compound

Mount Forest, Ont.—"Before I took Lydia E. Pinkham's Vegetable Compound, I felt weak and miserable, and had pains all through me. I was living in Alisa Craig at the time and one day a friend came in and told me her experience of using the Vegetable Compound and advised me to take a bottle, which I finally did. I began to get stronger and those pains left me. I am glad I found out about this medicine as I think there is none equal to it for women who have troubles of this kind. I cannot praise the Vegetable Compound too highly for the good it has done me. Wherever I know of a woman suffering I am glad to tell her of it." Mrs. W. H. HENDRICKS, R. R. No. 1, Mount Forest, Ontario.

Women throughout the Dominion are finding health in Lydia E. Pinkham's Vegetable Compound.

No harmful drugs are used in its preparation—just roots and herbs—and it can be taken in safety even by a nursing mother. For sale by all druggists.

W. N. U. 1569

Grain Inquiry Cost

The total cost of the royal grain enquiry commission was \$170,610. This information was given to Hon. R. J. Manion, Conservative, Fort William, in the House of Commons, by Hon. T. A. Low, minister of trade and commerce. Fees and living allowance paid to counsel of the commission totalled \$44,832. Of this amount \$3,300 was paid to Dr. A. C. Scott, \$15,177 to S. B. Woods, and \$19,355 to J. R. Fisher.

TORONTO, ONTARIO

turn being now at hand, a passage was sought for her aboard the Royal Mary, and in view of her uncle's rank and position, promptly accepted.

Lord Julian hailed her advent with satisfaction. His lordship was one of your gallants in whom existence that is not graced by womanhood is more or less of a stagnation. And Miss Arabella Bishop was a young woman and a lady; and in the latitude into which Lord Julian had strayed this was a phenomenon sufficiently rare to command attention. On his side, with his title and position, his personal grace and the charm of a practised courtier, he bore about him the atmosphere of the great world in which normally he had his being—a world that was little more than a name to her, who had spent most of her life in the Antilles. It is not therefore wonderful that they should have been attracted to each other before the Royal Mary was warped out of St. Nicholas. Each could tell the other much upon which the other desired information. Considering how his mind was obsessed with the business of his mission, it is not wonderful that he should have come to talk to her of Captain Blood. Indeed, there was a circumstance that directly led to it.

"I wonder now," he said, as they were stuntering on the poop, "if you ever saw this fellow Blood, who was at one time in your uncle's plantations as a slave."

"I saw him often. I knew him very well."

"You don't say?" and came to lean beside her. "And what manner of man did you find him?"

"In those days I esteemed him for an unfortunate gentleman."

Lord Julian was seeking to comfort and encourage her.

"You were acquainted with his story?"

"He told it me. That is why I esteemed him—for the calm fortitude with which he bore adversity. Since then, considering what he has done, I have almost come to doubt if what he told me of himself was true."

"If you mean of the wrongs he suffered at the hands of the Royal Commission that tried the Monmouth rebels, there's little doubt that it would be true enough. He was never out with Monmouth; that is certain. He was convicted on a point of law which he may well have been ignorant when he committed what was construed into treason. But, faith, he's had his revenge after a fashion."

"That," she said in a small voice, "is the unforgetable thing. It has destroyed him—deservedly."

"Destroyed him?" His lordship laughed a little. "Be none so sure of that. He has grown rich, I hear. He has translated, as it is said, his Spanish spoils into French gold, which is being treasured up for him in France. His future father-in-law, M. d'Ogeron, has seen to that."

"His future father-in-law?" said she, and stared at him round-eyed, with parted lips. Then added: "M. d'Ogeron? The Governor of Tortuga?"

"The same. You didn't know?" She shook her head without replying. After a moment she spoke, her voice steady and perfectly controlled. "But surely, if this were true, there would have been an end to his piracy by now. If he loved a woman and was betrothed, and was so rich as you say, surely he would have abandoned this desperate life, and—"

"Why, so I thought," his lordship interrupted, "until I had the explanation. D'Ogeron is avaricious, for himself and for his child. And as for the girl, I'm told she's a wild piece. It mate for such a man as Blood. Almost I marvel that he doesn't marry her and take her experience with him. It would be no new learning for her. And I marvel, too, at Blood's patience. He killed a man to win her."

"He killed a man for her, do you say?" There was horror now in her voice.

"Yes—a French buccanier named Levasseur. He was the girl's lover and Blood's associate on a venture. Blood coveted the girl, and killed Levasseur to win her. Pah! It's an unsavoury tale, I own. But men live by different codes out in these parts."

TORNADO TAKES TERRIBLE TOLL IN CENTRAL STATES

Chicago.—A tornado which tore through Southern Illinois after leaving Eastern Missouri, caused considerable damage in Indiana, before it died out to the northeast, after collecting a reported toll of 5,831 persons, dead or injured, on the basis of estimates available from the storm-swept regions where communication was largely destroyed.

While business and prostrated wires made the collection of data difficult, estimates which came in through various sources, with ever increasing totals, placed the total dead at 957 and the injured at 2,671.

The destruction of property was enormous. Several towns were almost entirely wiped out, and such populous places as West Frankfort and Murphysboro lost whole blocks of buildings. In the town of Paris only three persons were said to have escaped injury or death out of a population of 600.

The wind was so powerful at Paris that the bodies were carried more than a mile; it was reported. At Murphysboro, where the dead totalled 90, a schoolhouse was blown over the heads of 246 pupils, while at Decatur late estimates place the dead at 100 and the injured at 300, out of a total population of 700.

To Retain Liquor Profits

Alberta Government Will Not Divide Surplus With Municipalities

Edmonton, Alta.—The government has no intention of dividing the liquor profits with the municipalities of the province as promised last year, according to an announcement made in the legislature by Premier Greenfield. This was the first public announcement as to the policy of the government in this respect.

The reasons advanced for not giving the municipalities a share of the profits were:

First, that the province this year will be able to exactly balance its budget with the liquor profits, which are estimated at \$1,500,000 for 1925.

Second, that if the distribution of the profits were made, additional taxation would have to be imposed to make up the deficiency in provincial revenue.

Aeroplanes Prevent Fires

Forest Patrol Cuts Fires On Federal Reserve In Two

Ottawa.—Fires on federal forest reserves have been cut almost in half, states the annual report of the department of the interior. The success of the aeroplane in patrolling inaccessible districts and locating fires in their early stages, the report adds, has been clearly established, and it is hoped to have even more effective organization in the future along these lines.

Brandon Fair Awards

Brandon.—In the judging of cariot classes at the Manitoba Winter Fair, J. Tate, of Warren, Man., was awarded first prize for the best 15 finished steers, and the first prize group at the Winnipeg feeder and stocker show last fall. R. Fleming, of Calgary, was second with 15 Herefords; S. J. Henderson, Lacombe, third, with a group of Aberdeen-Angus that were second at the Calgary stocker and feeder show last fall; Thomas Wishart, Prairie, fourth; and R. J. Phil, Moonbeam, Sask., fifth.

Makes Tour of Rail Lines

Edmonton, Alta.—Count de Brancie, Paris, France, has returned from Jasper Park, where he went over the trap lines of "Curly" Phillips in company with the trapper, a hunt of 300 miles with snowshoes and dog teams, before he to the deep snow, the far catch was small, mostly lynx. The count will shortly leave on his return trip to France via Winnipeg.

Retain Colonge Bridgehead

Paris.—Diplomatic circles believe the Colonge bridgehead is likely to remain occupied for an indefinite period as a consequence of the rejection by the British Government of the League of Nations protocol.

Export Duty On Wheat Is Not Favored

Ottawa.—There will be no export duty on wheat, as was mildly suggested in the report of the royal commission inquiring into the grain trade. In connection with the budget, the matter has been considered, but the proposal will not be acted on. The idea embodied in the report was that an export duty, in stopping the flow of Canadian wheat to American millers who gird it for export, and when doing so to a removal of the American tariff on Canadian wheat generally.

Says West Freight

Rates Too Low

Winnipeg Alderman Concludes Investigation of Western Railway Situation

Winnipeg.—"Western Canada is suffering from too low, and not from excessive freight rates," Ald. J. G. Sullivan asserted on his return from Montreal, where he has spent seven weeks probing the western railway situation, in relation to the proposed Peace River Valley extensions.

Grain rates in Western Canada, Ald. Sullivan declared, were the lowest in the world, about 75 per cent, lower than those in the United States for similar distances.

"When a rate gets so low there is no margin left with which to pay interest on investments, and the country will consequently suffer from stagnation, there will be no development even in those parts where prospects of traffic would justify the construction of railway lines," Ald. Sullivan said.

He declined to commit himself relative to the Peace River situation, stating it would be poor taste for him to discuss a report which had not been made public by the expert engineers of the two railway companies.

Graham Favors Senate

Is Essential to the Stability of the Dominion

Montreal.—That the senate was essential to Canada's stability and should not be abolished, were declarations at the annual banquet of St. Patrick's Society by Hon. G. P. Graham, minister of railways and canals. Mr. Graham likewise defended the government's policy of not representing the throne in the Dominion, disagreeing with those who think Canada should have a Canadian as a governor-general.

Reduction of Armament

London.—British Foreign Secretary Lloyd George, replying to a question in the House of Commons, said he thought it already was well known that it was the desire of the government to promote the reduction of armaments by any agreeable means, but he was glad of the opportunity of again making it clear.

Chambers Islands Report Quake

London.—Severe earth shocks were felt along the northern coast of the Isle of Jersey and other of the Channel Islands. Residents declare the shock was the severest felt in the locality for many years. No damage was reported.

Fire Ravages Tokio

Tokyo.—Twenty thousand persons were rendered homeless when a major conflagration swept Northeastern Tokyo, destroying 2,000 buildings and resulting in unestimated casualties. The fire was brought under control.

Purchase Not Authorized

Ottawa.—The Vancouver board of harbor commissioners has not been authorized to purchase a new harbor boat, Hon. H. H. Stevens was informed in the House of Commons by the minister of marine and fisheries.

Nominate Candidate

Melfort.—O. D. Hill, Melfort, barrister and prominent as a protagonist of the Hudson's Bay Railway, was nominated as Liberal candidate for Melfort provincial constituency here on the first ballot.

Probe Wheat Price Fluctuations

Washington.—Secretary Jardine has directed the grain futures administration to make an immediate investigation of the recent violent fluctuations in the market price of wheat.

May Assume Management

D. H. MCDUGALL

former Vice-President of the British Empire Steel Corporation, who it is said, English directors desire to bring back to the management of the corporation.

Settlers From Hebrides

30,000 Acres of Land Purchased in Vermilion District

Montreal.—The Scottish Immigrant Aid Society, through which the immigration to Canada of settlers from the Hebrides has been carried out, has, through the province of the Empire Settlement Act, purchased 30,000 acres of land north of Vermilion, Alta., on which it is proposed to settle this year 150 Hebridean families, it is announced.

Through funds secured through the Empire Settlement Act, the society is building houses on each quarter section of the block. Everything will be found ready for the settlers on their arrival, and each family will be assisted with a loan to get farming operations under way.

Warned Against War Menace

Senator Says Canada's Greatest Danger Lies In Pacific

Ottawa.—The Canadian Parliament was not consulted and should have been consulted, on Canada's attitude in the League of Nations protocol, Senator Forster declared in the senate. For lack of parliamentary endorsement, Premier King's dispatch to Geneva lacked force, he said. Canada was drifting into a system of alliances similar to that which produced the Great War. Isolation was now impossible, and without the safeguard of the League of Nations, Canada might be committed to participation in future wars. The greatest danger lay, he said, on the Pacific, where a Russian-Japanese-Chinese Alliance would menace the peace of North America.

Outlook Brighter For Home Bank Depositors

Government to Consider Return of All Deposits

Ottawa.—Present indications are that the government will reimburse in full the losses incurred by the Home Bank depositors over and above what is realized from their assets. Legislation to be brought down shortly in this connection will be based on the claim that the warnings, given in 1915 were not acted on by the finance minister, Sir Thomas White, for fear of imperiling war finance. While the motive is not assailed, it will be argued that the bank depositors should not suffer.

Haig May Visit West

Regina.—Lord Haig may visit Saskatchewan on this Canadian trip, next summer, as "we received this morning by Premier Dunning, from Ian Macleod, Dominion Vice-President of the G.W.B.A. and chairman of the national conference, proposals that the utmost efforts of the committee will be exerted to induce Earl Haig and his party to visit this province."

Settlers From Sweden

Winnipeg.—From now until 1927, at least 6,000 Swedes annually will be available for emigration to countries other than the United States, a large percentage of these will come to Canada, according to H. P. Albert, minister of the Canadian Immigration, in an interview here.

United States Will Not Use Singapore Base

London.—Foreign Minister Austen Chamberlain denied in the House of Commons the possibility of use by the United States of the British naval base at Singapore, so that the question even had been discussed. Replying to a further question whether an understanding of any kind exists between British and United States naval authorities, Mr. Chamberlain said that he would find it easier to answer the question if he was confident that he understood it. "As it is, I will confine myself to saying that, so far as I know, there is not, now, and I hope there never will be, any understanding between British and American authorities," declared Mr. Chamberlain.

Co-operation Is

Need Of Empire

Development of Imperial Resources Is Considered Important

London.—At the first meeting of the imperial economic committee, which was appointed recently to deal with the marketing of empire products in the United Kingdom, in preference to foreign imports, Sir Philip Cunliffe-Lister, president of the board of trade, in welcoming the members of the committee representative of all parts of the empire, remarked that the committee's functions were advisory, and not executive, in which respect it resembled the imperial shipping committee. He emphasized the importance of development of the imperial resources and mutual trade among the various parts of the empire, and assured the committee that the government departments would do all in their power to assist its work. Sir Halford Macdonald, chairman of the committee, said it was an experiment in empire co-operation, and not an attempt at empire government. The future development of the empire, both in trade and in might, he said, lay in the application of the principle of co-operation. J. Forsythe-Smith and L. McQuatt, of Ottawa, are the Canadian representatives of the economic committee.

To Prevent Use Of

Adulterant In Butter

Minister of Agriculture Proposing Stricter Regulations

Ottawa.—Stricter regulations of the manufacture of butter and cheese and of canned foods, will be provided in legislation to be submitted to parliament by the minister of agriculture. The legislation will prevent the use of oil as an adulterant in butter and forbid the keeping of foreign fats, which might be used for adulterating purposes, on the premises of any persons engaged in the manufacture of butter. Inspectors also will be authorized to seize illegal dairy products. Canned fruit or vegetables are to be sold only in prescribed containers which must contain a regulation weight or quantity.

Will Revise Grain Act

Ottawa.—Hon. T. A. Low stated that it is his intention to proceed this session with the consolidation and revision of the Grain Act. There have been reports that it might be deferred but as the present act is obsolete, it is desired to revise it as soon as possible, and the new bill is being drafted by Mr. Justice Ferguson, largely on the lines suggested in the grain commission's report.

Likely Successor to Lord Byng

London.—The appointment of Prince Henry to the commission for the carrying out of the royal duties while the King, the Prince of Wales and the Duke of York are away, is regarded as most significant here, since Prince Henry is still regarded in many quarters as the likeliest successor to Lord Byng, as governor-general of Canada when the latter's term of office expires.

Sell Government Vessels

Ottawa.—Seven steamers of the Canadian Government Merchant Marine have been disposed of since the day was established it was stated in the House of Commons in answer to a question from W. A. Black, Conservative, Halifax.

TO BRING 1,000 FAMILIES EACH YEAR TO CANADA

London.—Saltings of families to Canada under the reciprocal scheme for overseas settlement between the imperial and Canadian Governments have just commenced for the season. One thousand families each season for the next three years is the mark aimed at. For the season of 1925, it is understood, that about 100 families have already been secured and that the immigration authorities will feel fairly satisfied if another hundred families can be accepted for this season.

The parties leaving now are going in comparatively small numbers on different vessels. The Canopic this week, however, carried thirty British families for Canada, totalling 168 individuals, giving a good average of five to the family.

Proposed Prison Reform

Lady Member of House Urges Payment For Convict Labor

Ottawa.—Miss Agnes MacPhail, Canada's only woman M.P., proposed in the house such changes in the administration of penitentiaries as would provide:

(1)—Sufficient productive work to keep the inmates employed.

(2)—That a share of the proceeds go to provide for dependents, and, in case of no dependents, such share be held in trust until release.

The resolution received warm support from both sides of the House.

Hon. Ernest Lapointe, minister of justice, Sir Henry Drayton, who at the time was leading the Conservatives, and Robert Forke, Progressive leader, announced their intention of voting in favor of L. H. Martell, Liberal, who had an amendment to eliminate the provision in regard to the prisoner with no dependents.

Time Extended For Starting Western Lines

Manitoba and Northwestern Railway Given Two Years

Ottawa.—An extension of time for two years within which to commence construction of the Manitoba and Northwestern Railway, extending from Theodore, Sask., to a point between Gowan and Lacombe, in that province, was approved by the railway committee of the House of Commons. An extension of time for two years, in which to commence construction of two branch lines in Alberta, one from Gowan to Glenora, and the other from Gowan to Lacombe, was also approved in favor of the Alberta and Irrigation Company.

Government Steamers Sold

Seven Disposed of Since Line Was Established

Ottawa.—Seven steamers of the Canadian Government Merchant Marine have been disposed of since the line was established. It was stated in the House of Commons in answer to a question from W. A. Black, Conservative, Halifax. They are the T. J. Drummond, the J. A. McKee, the Shiba, the Canadian Sealer, the Canadian Logger, the Canadian Miner and the Canadian Sealer. The total sum realized from the sale was \$745,000. Of this \$224,000 remains unpaid, but is still collectable and is property secured by statutory mortgage.

Cattle Breeders Elect Officers

Brandon.—James Bowman, of Quilich, Ont., was elected president of the Canadian Aberdeen Angus Association in annual session here. John H. Hume, of Souris, Man., is vice-president; the directors for 1925 for Saskatchewan are: W. D. Lyon, Dorset; James Browne, Neudorf; Alberta: L. Hutchinson, Duhamel, and S. J. Henderson, Lacombe.

Farmers Slaughter Wolves

Edmonton.—Farmers of the district north of Vilna no longer will have timber wolves dictate their hours of evening visits. Thirty-four farmers organized a drive recently, and before the day was over 17 of the big beasts had been slain. The settlers believe the pack has been exterminated, or so thoroughly frightened that there will be no more attacks on individuals.

Here and There

In conjunction with the further
loan of \$3,000,000 for colonization
to be authorized by the Quebec leg-
islature this season, it is also in-
tended to raise the bounty to set-
tlers on the acreage cleared. At
present the government gives a
bonus of \$5 an acre. It will be
raised to \$8 an acre. The province
spent \$30,000 in this way in the last
fiscal year.

The amount of butter exported to
Japan through Vancouver during
1924 was nearly twice that of 1923,
according to figures supplied by
the Japanese consulate at that point.
The report shows that in 1924 the
quantity was 476,454 pounds, as
compared with only 299,695 pounds
in 1923. Total cheese shipments to
the same destination last year
amounted to 2,655 pounds, as
against only 40 in 1923.

A recent analysis of immigration
according to occupation of immi-
grants arriving in Canada since 1920
shows a steady increase in the ra-
tio of agriculturists and domestics
towards all others. In 1921 the
figure was 35 per cent. It was
44 per cent for the fiscal year ending
March 31, 1922, 47 per cent for the
fiscal year 1923-24 and 51 per
cent for the nine months April to
December, 1924.

One of the outstanding features
of the Grain Commission Board's
report for the season 1923-24,
the tribute paid to the excellent
service rendered by the Canadian
Pacific Railway in handling the
western crop. Though the company
handled 105,000 cars of grain, it re-
ceived only six complaints about
lack of care from the railway and
commission combined. In 1923-24,
with an even larger number han-
dled, there were only eight com-
plaints.

Orchestra from the Canadian
Pacific steamships "Empress of
France" and "Empress of Scot-
land", when they arrived recently
at New York and before sailing on
their round the world and Mediter-
ranean cruises which the company
starts annually from that port
broadcasted through WJZ a forty-
five minute programme of selected
Scotts, English, Welsh, Irish and Ca-
nadian airs, while the "Montreal"
on her return from the company's
cruise to the West Indies, broad-
casted British and Spanish music
through WJY of New York.

Information furnished by J.
Frank Callbreath, packing con-
tractor and general merchant, shows
that during the 1924 hunting sea-
son, parties secured 12 moose, 25
caribou, 26 goat, 31 sheep, 15 black
bear and 11 grizzly in the Tele-
graph Creek district of British Co-
lumbia. Of the caribou, the largest,
shot by J. J. Sartori, of Brook-
lyn, N.Y., has a spread of 47 inches,
is 39 1/2 inches long and has 27
points. The largest sheep horns
were 41 1/2 inches long, with a spread
of 31 inches, and were secured by
A. D. Stewart, of New York.

The third annual Eastern Inter-
national Dog Sled Derby run off
at Quebec on February 19, 20 and
21, was a tremendous success.
Twenty-five harnessed and their
teams from twenty parts of Canada
and the United States competed
over the 120-mile course, the race
being won by Emil St. Germain, of
Le P. A. Harn, who also won this
year's derby at that place. The
last day's run was run through a
blinding snowstorm, which gave the
thousands of sports visitors from
Canada and the United States who
witnessed it, a vivid impression of
normal conditions experienced by
these sleds.

NOTICE TO CREDITORS
IN THE DISTRICT COURT OF THE
DISTRICT OF EDMONTON.
IN THE MATTER OF THE ESTATE
OF MARTIN KOTSCHEROFSKY,
DECEASED.

NOTICE IS HEREBY GIVEN THAT
all creditors of and all persons hav-
ing claims against the estate of Mar-
tin Kotscherofsky, late of the District
of Stony Plain, in the Province of
Alberta, farmer, deceased, who died on
or about the 25th day of October,
1924, are hereby required to send by
registered post, prepaid or deliver to
F. W. Landy, Barrister, Stony Plain,
Alberta, the Solicitor for the Ex-
ecutors of the said estate on or be-
fore the 10th day of April, 1925, their
names and addresses with full particu-
lars in writing of their claims and
statements of their accounts and the
nature of their security (if any) held
by them duly verified by statutory
oath.

AND FURTHER TAKE NOTICE
that after the said 10th day of
April, 1925, the Executors will proceed
to distribute the assets of the said
deceased amongst the parties entitled
thereunto, having regard only to the
claims of which they shall then have
notice, and they will not be liable for
the said assets or any part thereof as
distributed to any person or persons
of whose claim notice shall not have

been duly received by them at the
time of said distribution.
DATED at Stony Plain, Alberta, this
10th day of March, 1925.
J. W. LANDY,
Stony Plain, Alberta,
Solicitor for the Executors Julia
Kotscherofsky and Peter Kulak.

Bark P.O., who agent for owner.

Keynote of Northland is Mystery

A typical coastal Indian village scene. Left and Right, Haisla Indian totem poles now owned by W. G. Bannister of Vancouver. Below, The Princess Charlotte, one of the Canadian Pacific Fleet which plays the Alaskan route.

Mystery it is said, is the keynote of the north. Mystery
and silence. And because of its mystery there will
always be an attraction, something to draw men on and
hold them. For it is no mere legend that the north ever
calls back those who have once lived in the snow and the
mountains, or through an Alaskan summer. What is true
of Alaska is also, to a very great extent true of the east
and western shores of Vancouver Island and of the
northern mainland shoreline. Scarcely has one left
Vancouver or Victoria than there dawns the feeling that
here is a new life opening out. As everywhere there is
charm, so also is there mystery. One steps off at little
coastal villages to explore, or perhaps to fish or hunt, or
study native life or industry, and the first thing that one
runs into is the mysterious totem pole, that Indian
"family tree", which has great significance in the abori-
ginal history and life of the Indians of the Coast, but
which conceals its strange tales from the uninitiated
white man.

Two striking examples of Indian art, totem poles
which are said to be among the best on the Pacific Coast
because of their excellent design, legendry and historical
importance, have been brought from the west coast of
Vancouver Island to Vancouver, B.C., where Mr. C.
Bannister, who secured them from the Indians, has
erected them in front of his home. They were made by
the Haisla Indians and illustrate native legends and
tribal history.

The Haisla Indians lay claim to being the first
natives to see the white man in British Columbia. The
tribe's legend of the coming of these men dates back to
1788. The story told by these Indians is:

"Two Indians were travelling along the west coast
in a canoe and in a light mist they came out of the mist
there loomed a giant canoe with white wings and skulls
hanging from them. All over the decks of the boat
seemed strange-looking creatures such as they had
never seen before. They had white faces and stone feet.

"One of the strange paddlers took a long stick and
pointed it in the air and it spouted fire. Immediately a
seagull fell dead.

"The two Indians in the canoe never recovered from
the shock of this quick succession of strange and terrify-
ing scenes and died on the spot."

The totem which Mr. Bannister has secured exceed-
ed twenty feet in height and have been set in concrete bases.
The Great Eagle on the top of one of the poles was looked
upon by Indians as a deity and is seen bringing the whale,
which is also an emblem of great strength to the power-
ful chief, Coe-Ta-Ka-Nim who was famous as a whale
hunter.

When a potlatch, or great giving away feast was held,
all of the people of the tribe would gather in the lodge
of the chief and a human skull thrown in amongst them.
The man who was able to get out of the lodge with the
skull was the lord of the potlatch and received the
greatest measure of gifts and attention. Coe-Ta-Ka-Nim
evidently accomplished this feat as he is seen holding the
skull in his hands. The large killer whale beneath is part
of his family crest or emblem.

On the other pole the top figure is the official dancing
mask of the Haisla chief. Beneath is depicted the
legend of the Kingfisher and the Great Bear.

The Kingfisher was looked upon as a great prevaricator
and hoaster. One day the bear was walking by a creek
where the kingfisher was fishing. The Great Bear said
"Tum-Moo-Kee, you are always boasting to everybody of
what you can do, yet you never seem to do anything. Now
you never hear me boast, but I will show you what I
can do." He stood up on his hind legs and started to draw
a serpent out of his stomach, such to the astonishment
and amusement of the kingfisher.

In nearly all Indian legend the characters took on a
dual personality, and were able at any time to change
themselves into birds, animals or fishes.

GILLETTS 100% PURE LYE

GILLETTS 100% PURE LYE

WORLD HAPPENINGS BRIEFLY TOLD

Jacob Gould Schlegman, now United States minister to China, has been named by President Coolidge as ambassador to Germany.

The Canadian Pacific Railway hauled 3,761,661 tons of grain to Port William and Port Arthur during 1924, and 961,600 tons to the port of Vancouver in the same year.

Eamon de Valera, the Irish Republican leader, issued a rhetorical St. Patrick's Day manifesto to Irishmen abroad, appealing to them to rally to the aid of their "threatened country."

Dynlight saving will come into force in Montreal on May 3 this year and will cease on September 27, according to a motion carried in the city council.

All the way from East Africa, 9,000 miles, a native brought a sample of hog blood containing a dread animal disease, to the department of agriculture, Washington, for experimentation purposes.

A new service by direct cable between Rome and New York, over which it is hoped to transmit cable five times faster than heretofore, was successfully inaugurated. Total length of new line is 6,422 land miles.

Rub it in for Lane Back—A brisk rubbing with Dr. Thomas' Eucalyptic Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissue and bring speedy relief. Try it and be convinced. An inflamed skin, the pain comes out and there are ample grounds for saying that it is an excellent remedy.

Alberta and B.C. Press Association The Alberta Press Association executive met in Edmonton and fixed the dates of the annual meeting as August 28 and 29, at Edmonton.

British Columbia Press Association will meet at the same time, also in Edmonton.

Dairy Convention For Winnipeg

Arrangements Made For 1926 Meeting Says Manitoba Dairy Inspector

Mr. L. A. Gibson, provincial dairy inspector for Manitoba, recently announced that arrangements have been completed for the holding of the 1926 annual convention of the Western Canada Dairy Association in Winnipeg. Executives of the Manitoba Dairy Association and of the Manitoba Buttermakers' Association met to decide on the dates of the convention, and also to decide upon various competitions for the ensuing year. During the past year, 189 carloads of creamery butter were shipped out of the province of Manitoba, a total of 4,455,200 pounds valued at \$1,463,516. The shipments included 29,000 boxes of unsalted butter that were shipped to the British market, the first time that Manitoba has shipped unsalted butter to this market.

"DIAMOND DYE" IT A BEAUTIFUL COLOR

Perfect home dyeing and tinting guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint linens, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new.

Buy "Diamond Dye"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

Americans Dance To Music From London

Radio Programmes Picked Up By New York Successfully Re-broadcast

The first radio programme of London dance music to be successfully re-broadcast to a large American audience, has been sent out from Station WJZ, New York City, and WRC, Washington.

The music of the Hotel Savoy, London, dinner orchestra, was picked up by the United States stations, and re-broadcast on a different wave length by the Radio Corporation of America. The radio audience also heard the strains of "Big Ben" on the clock tower of the House of Parliament strike the hour of midnight.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Expeller to drive out the parasites.

A Woman Caf Distributor

Miss Lucy Wright Has Responsible Position With U.S. Railroad

Miss Wright must know crops and crop conditions. A great wealth of years means a shifting of freight cars and in the same manner an unusual orange yield in California influences the routine of office. An early spring or a late fall affects the demand for freight cars and the unprecedented cold weather in many parts of the east brings new problems.

Miss Lucy Wright, general car distributor of the Grand Trunk Railway, is said to be the only woman in the United States occupying the position that carries with it a demand for great executive ability. It is her duty to keep on the move thousands of freight cars and to meet promptly the demands of shippers. An able freight car cost the railroad a dollar a day and Miss Wright has 15,000 cars in her division which must be always employed unless heavy losses are carried.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

Wheat Goes to United Kingdom There was a heavy increase in the quantity of Canadian wheat supplied to the United Kingdom in 1924, amounting to 80 per cent over 1923, according to a report of the department of trade and commerce.

For Sore Feet—Mirand's Liniment

Hope Of The World

VISCOUNT CECIL

of Chelwood, who declared in a recent speech that the only hopeful hope for the survival of Christian civilization lay in nations preparing to co-operate and to shoulder their share of the burden of safeguarding the peace of the world.

Demonstration Farm For Russia

Will Be Equipped With Modern Machinery and Implements

Seven groups of Russian farmers, who have lived for a time in the United States, left New York recently under the direction and organization of the Technical Aid Society to establish modern farms in Russia. These will serve as demonstration farms for the Russian peasants. All these groups have equipped themselves with modern machinery and implements. These groups were sent by the Technical Aid Society to settle in communities in Soviet Russia.

HEART TROUBLE SHORTNESS OF BREATH

Mr. Geo. E. Bowman, Morrisburg, Ont., writes:—"I am writing you a few lines to let you know of my experience with Milburn's Heart and Nerve Pills. Two years ago I became very poorly, with my heart and nerves and whenever I took the least little bit of exercise my heart would start to jump and flutter. I could not walk upstairs without having to rest and rest before I was half-way up, on account of my breath becoming so short. I commenced taking

MILBURN'S HEART AND NERVE PILLS

and in no time I felt a great improvement, and can now heartily recommend them to all those who are troubled with any affection of the heart."

St. & N. Pills are for sale at all drug and general stores; put up only by The J. Milburn Co., Ltd., Toronto, Ont.

Increase In Hog Production

Tops to the number of 2,040,000 hogs, were marketed at the stockyards and packing plants of Canada during the year 1924, as compared with 2,302,000 in 1923. The greatest amount of increase was in the prairie provinces for in 1923 there were marketed in these places 698,000 hogs, and in 1924, 1,065,511, or a 50 per cent. increase.

Suffered Misery With Itchy Eczema Cuticura Healed

"I was troubled with eczema for over two years. At first it appeared in small spots and then began to spread all over my face and head until I suffered awful misery. The itching and burning were terrible. At times I thought I would go crazy and was obliged to give up my work."

"I was treated and tried different ointments without any benefit. I read an advertisement for Cuticura Soap and Ointment and decided to try them. After the first application I felt relief. I continued the treatment for a time and now I am healed." (Signed) Miss V. Wood, 286 City Hall Ave., Montreal, Quebec.

Cuticura Soap, Ointment and Tablets are ideal for daily toilet uses.

Sample Bath Free by Mail. Address: Canadian Agents—Cuticura, E. C. Wood, Montreal, Quebec. Write for new Cuticura Soap. Try our new Shaving Blade.

SUNDAY SCHOOL LESSON

MARCH 29

REVIEW—CLOSING PERIOD OF CHRIST'S MINISTRY

Golden Text: Jesus Christ is the same yesterday and today, and for ever. Hebrews 13:8.

Devotional Reading: Revelation 1:9-18.

Loyalty to Christ the King: Lesson 1.—On the last Sunday of his earthly life, Jesus Christ, as the prophet Zechariah had foretold, made his triumphant entry into Jerusalem, meek and riding upon an ass. The whole city was moved. The people acclaimed Him King, though they did not really recognize what that kingship meant. The Romans expected some public rising; the Pharisees, a party was aroused to new envy and malice; the Herodians dreaded a possible insurrection; but the populace entertained for the moment the idea that their hope was now fulfilled, that the long-looked-for Messiah had at last appeared, and would lead them to victory. But after looking round about the temple, Jesus passed quietly out of Jerusalem and returned to Bethany for the night. He did no wonder, the Jews had no revolt against the hated Roman rulers. The enthusiasm of the country people and the curiosity of the city folk soon waned. Before the week was over the cry of "Blessed is the King!" was changed to "Crucify Him!"

Unchanging loyalty to Christ is the mark of all his true followers. Loyalty to the right is grounded on this personal loyalty to Him who is wholly righteous. "Christ was for a long time my King," said an earnest follower of His, "but I fear He was only a constitutional over-claim and I was His prime minister. Now He is absolute Lord, and this has made a great difference in my life."

Good Season For Lumbering

Conditions Have Been Very Favorable in Thunder Bay District

Winter lumbering in the Thunder Bay district will have better returns to operators this year than for several seasons. The conditions have been exceptionally good. Fine weather has prevailed in the woods since the cut was started late last fall. It is estimated that close to sixty per cent of the total winter cut will be used for home manufacture, while 40 per cent will be rafted for export to the United States mills.

Milner's Worm Powders act so thoroughly on the stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found a healthy medicine, strengthening the infantile stomach and maintaining it in vigorous operation, so that, besides being an effective vermifuge, they are a tonic and health-giving in their effects.

Expect Record Tourist Trade According to estimate by officials of Montreal steamship companies, more than 40,000 tourists, the largest number on record, will sail from Montreal for Europe during the coming season of navigation. They will include a larger number of United States citizens than ever before.

Mirand's Liniment Fine for the Hair

Sale of Coal in National Parks The regulations governing the licensing of businesses, trades, or occupations within Canadian national parks were amended by order in council dated February 2, 1925, so that every person selling coal by weight within the parks shall have all coal sold in quantities or loads of one thousand (1,000) pounds each or over, weighed on the scales maintained by the department for the use of the public. The fee for weighing coal shall be fifteen (15) cents per load.

For Sore Throat Use Mirand's Liniment

Have Laugh On Robbers Shopkeepers at Bath, Eng., have had the laugh on robbers recently. One gang of burglars cut a hole in a tobacconist's window and stole a lot of packets—all dummies and empty. In robbing a wine merchant's store they stole five bottles of colored water.

MOTHERS PRAISE BABY'S OWN TABLETS

Mrs. L. M. Brown, Walton, N.S., says:—"I cannot recommend Baby's Own Tablets too highly. I have found them invaluable for the ailments of little ones." Mrs. Brown's testimony is the same as that of thousands of other mothers who have used the Tablets. To use them once is a sure guarantee that they will always be kept in the home as long as there are babies or young children to be cared for. The Tablets are a laxative—mild but thorough in action—which never fail to regulate the stomach and bowels; relieve constipation and indigestion; break up colds and simple fevers and make the dreaded teething period easy. In fact they banish all the minor ills from which little ones suffer. The Tablets are sold by medicinal druggists or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Large Newspaper Production

Production of newspaper by Canadian mills in February amounted to 115,624 tons, the average daily production being 150 tons greater than in January.

For the first time the output of the Canadian mills surpassed that of the United States mills, the production of the latter amounting to 113,321 tons, 1,792 tons less than the Canadian production.

Calendar.

March—
26—Instruction school in Edmonton for Ford tractor owners.
28—Moving picture, "Lone Star Ranger."
April 3—Twp. Councillors meet at Carvel.
8—Meeting in Town Hall, by Mrs. West, of the Red Cross Society.
13—Box social and dance at Holborn Hall.
14—J Hrabeznik sale.
15—Stony Plain W. E. meeting.
29—District Court sits in Stony Plain.

Stony Plain and District

Mrs Schwartz is visiting this week with her daughter in Edmonton.

Rev K Eberhardt and Mr Erwin Golz were business visitors to the City on Monday.

Mr Geo Graden, well and favorably known in this district, has been appointed field salesman for the Stony Plain Garage for Ford cars.

The Trail Rangers are putting on their annual concert tomorrow (Friday) night.

Mr William Barth has removed to Edmonton, where he is said to have purchased a barber shop business on Jasper avenue.

Officer Smith was in attendance at a Court sitting before Justice of the Peace White, in Wabamun Tuesday, when a man named Graves of Keep Hills was charged with the theft of logs.

Admissioner Zucht, held a very successful sale Tuesday for Mr Byden. Good prices were gotten for everything offered. Cattle are picking up in price, owing to the near close of the feeding season.

A meeting will be held in Stony Plain on Wednesday, April 15th by the local Women's Institute, at which Mrs Wm Short, of Woodbend, convener of Stony Plain constituency, will be present. The speaker for the afternoon will be Rev W J Whelan. Place of meeting to be announced later.

Young Mr Adams, who lives near Strawberry Creek, was fortunate in securing on Sunday last a ten-pound eagle with a lucky shot from his rifle. The bird measured 8 ft. from wing-tip to wing tip. It has been sent in to an Edmonton taxidermist, to be mounted.

Help us make a bigger and better Sun each week by phoning or sending in any local news item. We print Wednesday afternoon.

Plant Only Good Seed

Good seed, grain can be secured from two main sources viz: Reputable seed growers who are members of the Seed Growers' Assn; or direct from reputable seed dealers. Buyers should insist on knowing the grade to which the seed they are buying belongs and they should be thoroughly acquainted with the definition of each grade. It is now illegal for any one to offer for sale seed of any kind that is not accompanied by a certificate of grade. Copies of The Seed Act may be had by writing to the Dominion Commissioner, 117 Victoria St., Ottawa.

Sporting Notes.

A good game of curling was played Friday night last, Islanders versus the Stroulers, when the baseballers won by a score of 12 to 8. Stroulers: J Smith, Kibblawaite, K H Brooks, Roblins (skip), baseballers: Laird, Walker, Lundy, McCulla (skip).

The second last contest for the Grand Challenge prize was played at the local rink Saturday night, when Roblins' rink beat McCulla 8 to 5 for first place. The two finks tied for second place, Brooks and J Smith's, will probably have to draw straws for second honors, as the ice in the rink had a relapse this week and may not recover.

If the weather permits, a hockey game between Concordia boys and Fuh's Pets may be played on local ice next Sunday.

And now the baseball fans are already arranging for next season's schedule of games in a new league to be formed.
